

BELGIOIOSO®

Parmesan

Parmesan's sweet, nutty flavor with just the right amount of earthiness and tantalizing aroma. Its versatile texture lends itself to most any dish. It's the King of Italian cheeses.

Our Parmesan Process

► Fresh Milk

Made from locally sourced milk within 30 miles of production facility. Fresh milk is the key to BelGioioso's quality. The fresher the milk, the cleaner the flavor and the longer the shelf life.

► Home Grown Starter Cultures

We grow our own starter cultures on a daily basis. Starter culture is made from the whey of a previous batch of cheese. Each cheese has its own unique starter culture. It is a roadmap, of sorts, that tells the milk what type of cheese it will become. By using our own starter culture, the flavor and consistency of our cheese is handed down from batch to batch. This gives a flavor that cannot be matched by anyone else.

► Natural Brining

Our traditional brining method creates a solid cheese body, uniform color and cheese with the right amount of salt and a clean finish.

► Aging Process

Aging creates deeper flavor and complexity in our cheeses. BelGioioso cheeses are aged on custom racks in a controlled atmosphere and hand turned for days. Our aging process allows the cheese to develop slowly to create the best aroma and flavor in the world.

About Parmesan

Crafted from fresh milk gathered daily. Our controlled brining process creates a signature golden rind and minimizes discoloration and inconsistency in the body of the cheese. Each wheel is aged in special aging rooms for over 10 months. Our Master Cheesemakers hand-turn each wheel to ensure a consistent aging process. This expert care develops Parmesan's sweet, nutty flavor.
